#ICHOMVLS

THE ICHOM VIRTUAL LEARNING SERIES 2021

Created in collaboration with the Conference Programme Advisory Committee (CPAC) the ICHOM Virtual Learning Series 2021 is designed to explain and promote value-based healthcare (VBHC) by highlighting the importance of ICHOM Standard Sets adoption to continuously improve the outcomes that matter most to patients.

The series of insightful and interactive webinars and practical workshops will serve as a perfect opportunity to better understand how to adopt the ICHOM Standard Sets, measure and apply the outcomes that matter most to patients as well as benefits of benchmarking both locally and globally. The patient voice will be a central component of the conversation. Patients will share their role and experiences of partnering with care providers to co-produce the outcomes most meaningful to them.

SERIES OF WEBINARS AND WORKSHOPS

THEME 1:

ICHOM Standard Sets Implementation – How and where to start the transformation to outcomes based care

24 March Webinar:

Humanising Healthcare – Your Journey to Value-Based Healthcare

[LEARN MORE](#)

21 April Workshop:

Key Steps For Successful ICHOM Standard Set Implementation

[LEARN MORE](#)

THEME 2:

Outcomes Measurement – Using data to co-produce better care pathways for patients that result in high-value results

19 May Webinar:

Applying Patient-Reported Outcomes for Better Informed Decision-Making and Care Improvement

[LEARN MORE](#)

30 June Workshop:

Patient-Reported Outcomes Data Management and Application in Practice

[LEARN MORE](#)

THEME 3:

Benchmarking Outcomes – Building a continuous learning system that enables identification of best practice, setting concrete targets and driving change

22 September Webinar:

How can we do this better? Importance of Benchmarking for Shared-Learning, Personalisation of Care and Healthcare System Reform

[LEARN MORE](#)

NOVEMBER CONGRESS

8-10 November

Keynote plenary sessions, breakouts and panels with multisession content including opportunities for extensive networking

Topics will include

- The impact of COVID-19 on delivering patient-centric care
- ICHOM Standard Set Implementation Case Studies
- Patients' perspective and involvement in shared decision-making and care transformation
- ICHOM Benchmarking platform and machine-readable standards
- Delivering patient-centric care when there is no applicable ICHOM Standard Set available
- Building VBHC culture and organisational structure enabling change
- Value-based contracting and payment models
- Innovative IT Systems and the growing role of eHealth

YOUR TOP REASONS TO ATTEND

Clinicians

- ▶ Listen to practical implementation examples of ICHOM Standard Sets (where to start, key things to consider, engagement strategies and key lessons learned)
- ▶ Understand how benchmarking enables organisations to learn from each other and therefore optimise patients' care
- ▶ Hear and understand patients' perspectives and experiences
- ▶ See how outcomes data can be used to inform patient choice through care pathways
- ▶ Learn from real life examples of how organisations share patient-reported outcome data to advance their approach to patient-centred care

Patients

- ▶ Get your voice heard- Share your experiences and the outcomes most important to you
- ▶ Learn how you can play a central role when healthcare providers are implementing value-based healthcare
- ▶ See how tools and data can help you make an informed decision based on your needs, preferences and goals
- ▶ Hear real life examples of how benchmarking and shared learning can improve patients' outcomes and quality of care
- ▶ Understand what healthcare organisations are doing to improve the outcomes most important to you
- ▶ Discover how you can leverage national or international patient organisations to increase the pressure on providers for outcomes measurement and transparency

Government

- ▶ Gain insight into how organisations can improve patients' care and outcomes by adopting ICHOM Standard Sets
- ▶ Discover how government changing policy and regulation can facilitate value-based healthcare for improving patients' outcomes
- ▶ Learn about ICHOM and how ICHOM Standard Sets can help improve the healthcare outcomes in your country
- ▶ Identify barriers to outcomes benchmarking and policies to encourage and facilitate sharing of outcomes data to drive improvement
- ▶ Understand how variation in patient outcomes can be instrumental in adapting care pathways to patient preferences and the implications for suppliers to healthcare

Pharma/Medtech/Insurance

- ▶ Listen to and understand care providers' and patients' needs
- ▶ Understand the variation in outcomes in targeted patient groups
- ▶ See how benchmarking can help test the effects of the new treatment in real life
- ▶ Find out more about the generation of real world data through outcomes measurement
- ▶ Discover how variation in patient outcomes can be instrumental in adapting care pathways to patient preferences and the implications for suppliers to healthcare
- ▶ Learn about current and future benchmarking networks and how the industry could benefit from value-based remuneration agreements

WHAT THE ICHOM COMMUNITY SAID ABOUT THE CONFERENCE SERIES IN 2020

Click on the image below to view some of our insightful content from 2020:

Video

"Thank you for including me the networking group for mental health.

I was happy to be a part of the discussion!

It means a lot to me that you would trust me to chair even though I am a patient with mental illness. Very welcomed and very forward thinking.

I love ICHOM and all the associated professionals. This framework for change through value based healthcare using a standard set approach gives accountability and meaning to outcomes as measures of engagement.

Being at this conference gives me great hope. As we discussed in our networking group it will take persistence. Having a framework for change is the hardest piece in my mind. Now, we have to spread the word of what is possible.

Thank you ICHOM for all your efforts in making the world a better place."

Elizabeth Anderson, Patient and Delegate, Conference Series 2020
