Introduction

Value Based Health Care (VBHC) is at the helm of the Saudi Arabia health transformation efforts as part of Vision 2030. Among outcome measures, Patient Reported Outcome Measurement (PROM) is a key prerequisite for VBHC.

Triggered by several efforts to design and deploy PROMs in the private and public sectors, there was a need for a coordinated approach to develop a national PROMs strategy in Saudi Arabia. ViH and CHI in collaboration with PwC and The Clinician embarked on a project to set the foundation for PROMs implementation in the private sector as a first step to establish the learning for scalability nationally.

Methods

The PROMs strategy was co-designed during a collaborative workshop with key relevant stakeholders to envision the desired future state.

Furthermore, stakeholders were engaged in formulating the vision, mission and strategic direction of the PROMs strategy.

Based on the co-designed strategic direction, the strategic initiatives were detailed and used to develop the PROMs strategic roadmap and successfully execute the PROMs strategy.

Results

**PROMs Pilot implementation**

- Implement a PROMs proof of concept for cataract and gather lessons learned to further guide and support PROMs implementation

**Value-based contracting**

- Link PROMs to value-based contracting

**Next Steps**

**PROMs Pilot implementation**

- Implement a PROMs proof of concept for cataract and gather lessons learned to further guide and support PROMs implementation

**Value-based contracting**

- Link PROMs to value-based contracting
